Profile

I am an inclusive, thoughtful fullstack developer with past experience in UX and writing consultancy. I work across roles with broad, practical empathy and a deep curiosity. Whether designing or building an app, I create open and inclusive interactions based on research, dialogue, and data.

Experience

UX engineer, CTPost Design

March 2018 - present

- Design and refine sites like [findthemasks](#), serving over 30,000 people per day and providing key information to a network of international organizations
- Create inclusive content and interactions to inform, guide, and delight customers and users.

Writing consultant, ELP Forensic Social Work

January 2012 - May 2018

- Crafted clear and impactful narratives from primary documents and stakeholder interviews (up to 300 pages) to support findings in as little as 48 hours.
- Wrote plans (20–48 pages) for treatment and family reunification in complex court cases 12 to 24 times a year.

Fourth manager, QFC

October 2008 - March 2018

- Trained and mentored diverse staff of 64 people.
- Consulted customers, employees, data, and surveys to form strategies to increase profit by 4% year over year and increase customer satisfaction by 20%.

Education

General Assembly SEI

2020

- Fullstack development.

University of Washington

1999–2006

- Philosophy, Japanese.
